

Astragalus 300/12

"Carpe Diem" with Astragalus membranaceus

Astragalus membranaceus is also known as Tragant in our latitudes. As a herbaceous plant with multicoloured flowers, the plant, which originated in the mountainous regions of China, belongs to the subfamily of papilionaceous plants. For Biogena Astragalus 300/12, however, only the valuable root is processed. The tragacanth root contains valuable ingredients and has therefore been used for over 4000 years in traditional Chinese natural history as a tonic and for general well-being. Polysaccharides and the valuable astragalosides, a class of triterpene saponins that belongs to the tragacanth root, accumulate in the root. The content of these special secondary plant substances is an important quality feature for Biogena when using this proven plant - for this reason, the extract used has been standardized to 150 mg polysaccharides and 12 mg astragaloside IV per capsule. With Biogena Astragalus 300/12 you have an Astragalus product with guaranteed consistently high quality at your disposal - the ideal daily supplement for your well-being.

Astragalus 300/12

- With 150 mg polysaccharides and 12 mg astragaloside IV per capsule

Possible applications:
