

L-Glutamin 3000

Glutamine in practical READY TO GO-Sticks

L-Glutamine in highest purity and quality (Kyowa Quality®)

After a fundamental product revision, Biogena now offers L-Glutamine in easily dosed READY TO GO sticks; even one L-Glutamine 3000 stick covers the daily consumption recommendation. L-glutamine is a non-essential amino acid for humans, which was first described in 1877. With a proportion of about 20 %, glutamine is the main component of the pool of free amino acids in the blood plasma, with the highest concentration being found in the muscles. Through a balanced diet, humans consume about five to ten grams of glutamine a day - in addition to the amount produced by the body itself. Glutamine-rich foods are mainly various dairy products, such as quark or yoghurt; soy and cereal products contain lower concentrations of this non-essential amino acid. Biogena L-Glutamine 3000 provides glutamine in its bioident L form and thus provides an optimal source for additional supply in addition to daily nutrition and the body's own synthesis. The Kyowa Quality® quality seal of the brand manufacturer Kyowa also guarantees raw material production that meets the highest quality and purity criteria.

L-Glutamin 3000

- Contains the amino acid glutamine in bioidenter L form in practical READY TO GO-Sticks
- Guaranteed L-glutamine in highest purity and quality (Kyowa Quality®)

Possible uses:

- For a targeted intake of the amino acid L-glutamine

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Fructose free
- Lactose-free
- Hypoallergenic
- 100 % vegan
- Quality tested
