

Liver Bile Formula

Plant substances for liver and gall bladder

Metabolic factory liver

The liver is the largest metabolic organ in the human body. It utilizes the nutrients ingested with food, produces proteins, serves as a storage organ and regulates the hormone and immune system. However, the liver also has to cope with many substances that have to be excreted like no other organ. Alcohol, medication and environmental substances can challenge the most important excretory organ. This makes nutritional support for the liver and its auxiliary organ, the gallbladder, all the more important. Plant extracts have long been used for this purpose. Milk thistle, for example, helps to maintain

Function and, together with artichoke, supports the stimulation of the liver-bile system.

Liver Bile Formula: Plant extracts for the liver and gall bladder

Liver Bile Formula from Biogena contains selected plant extracts for the nutritional support of the liver and gall bladder.

Possible uses:

- For targeted support of the liver, especially in times of high stress
- To support the production of bile
- Milk thistle helps to maintain liver function and, together with artichoke, supports the stimulation of the hepatobiliary system.

Bioavailable micronutrients in pure form:

- According to the pure substance principle
- Without colorants and flavorings
- Gluten-free
- Lactose-free
- Vegetable capsule shell
- 100 % vegan
- Tested quality
