

Uro Caps PAC40

Plant-based active complex to support the bladder function

Urinary organ, the bladder

Our kidneys are real high-performance organs: Approximately 180 litres of water flow through their filter system every day, whereby only 1.5 litres end up as urine and leave the body through the bladder. In this process, the kidneys not only clear waste products out of the body, but also filter out vital substances and guide them back into the blood circulation. Urine is temporarily stored in the urinary bladder. It makes it possible for us to release urine when convenient and just from time to time, although urine constantly flows out of the kidneys. Complete micturition (urination) is important for the self-purification of the urinary tract organs.

Uro Caps PAC40

- A plant-based combination preparation to support the bladder function
- With stinging nettle extract for men as a contribution to a healthy prostate and to the improvement of micturition (bladder emptying)
- Vitamin C to maintain normal immune function
- Combined with valuable standardised proanthocyanidins (PAC) from cranberry extract as well as
- Extracts from pumpkin seed and rosemary

Possible uses:

- To support the bladder function
- For the targeted intake of valuable plant extracts

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
