

Nutrient Paro Pro®

To maintain the gums

Micronutrients for a radiant smile

The gums are an important component of the entire periodontal apparatus and are essential for the dental health and a radiant smile. In addition to thoroughly brushing your teeth, cleaning the spaces between your teeth with dental floss everyday and adjuvant use of mouthwash, the daily diet also has an impact on your gums. In this connection, different micronutrients play an important role and can support the gums in a targeted manner. For example, vitamin C promotes the normal formation of collagen, which is a component of gum tissue. Furthermore, antioxidative vitamins and minerals such as vitamin E, zinc and selenium can help to protect the cells against oxidative stress. Biogena Nutrient Paro Pro® contains all these micronutrients in appropriate dosage and can help to maintain the gum tissue. This formula is rounded off with other valuable ingredients: With coenzyme Q10 in the active ubiquinol form (KANEKA UBIQUINOL™), alpha lipoic acid and high-quality extracts from grape and cranberry.

Nutrient Paro Pro®

- Vitamin C supports normal collagen formation for normal function of the gums
- Zinc and selenium as well as the vitamins C and E help to protect the cells against oxidative stress
- Contains coenzyme Q10 in the active ubiquinol form (KANEKA UBIQUINOL™) and alpha lipoic acid
- Contains high-quality extracts from grape and cranberry

Possible uses:

- To maintain the gums
- To support protection against oxidative stress
- For the supplementary supply of ubiquinol (coenzyme Q10), alpha lipoic acid and extracts from grape and cranberry

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours and flavours
- Gluten-free
- Lactose-free
- Vegetable capsule shell
- 100 % vegan
- Quality tested
